

\*Download & print this at: [HealthyTahoe.org/flyer](http://HealthyTahoe.org/flyer)

**1,600 acre Meyers is near a 2,400–3,600 acre spray area.**

**Glyphosate causes cancer**  
per the State of California / CalEPA.

**Consider dust on windy days.**

 And runoff on wet days.

**Brush benefits:** anti-erosion, watershed cover, wildlife habitat, nutrient renewal. Chaparral is a natural phase of reforestation.

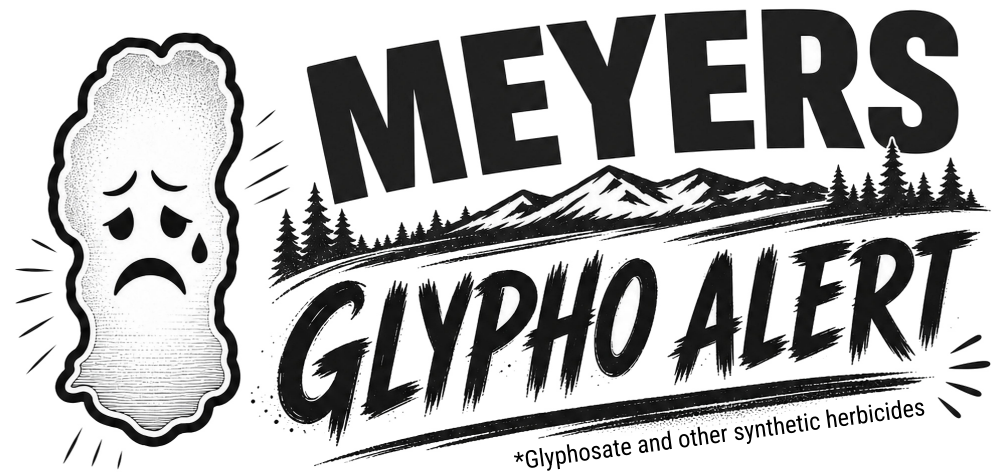

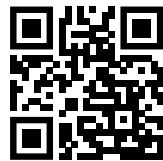

*\*Removing the native Tahoe chaparral can invite even more flammable invasive grasses, potentially more spray, over time.*

**TELL PublicComment@TRPA.gov: 1) Ban all synthetic herbicides in Basin, 2) Only hand-crew thinning in Caldor.**  
Healthier for the forest, water, wildlife, workers; and us: 

Tell them why this matters to you! [HealthyTahoe.org/TRPA](http://HealthyTahoe.org/TRPA)
